

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (previously presented): A wood floor edger comprising:
a first housing comprising a first opening, a second opening, a third opening, and a rotatable abrasive disc located proximate said first opening, said rotatable abrasive disc having a diameter greater than six inches;
a motor at least partially located in said second opening and drivingly connected to said abrasive disc;
a fan located in said first housing, said fan being drivingly connected to said motor; and
an air path extending between said first opening and said third opening by way of said fan.

Claim 2 (original): The wood floor edger of claim 1, wherein said rotatable abrasive disc has a diameter of about seven inches.

Claim 3 (previously presented): The wood floor edger of claim 1, wherein the weight of said wood floor edger is about twenty-seven pounds.

Claim 4 (original): The wood floor edger of claim 1, wherein said motor is rotatable at a speed of greater than ten-thousand revolutions per minute.

Claim 5 (previously presented): The wood floor edger of claim 1, wherein said motor is rotatable at a speed of about ten-thousand five-hundred revolutions per minute.

Claim 6 (original): The wood floor edger of claim 1, wherein said abrasive disc is rotatable at a speed of about three-thousand two-hundred revolutions per minute.

Claim 7 (original): The wood floor edger of claim 1, wherein said motor has horsepower greater than two.

Claim 8 (original): The wood floor edger of claim 1, wherein said motor has horsepower of about 2.4.

Claim 9 (original): The wood floor edger of claim 1, wherein said motor is connected to said rotatable abrasive disc by a belt.

Claim 10 (cancelled)

Claim 11 (previously presented): The wood floor edger of claim 1, wherein said fan is located within a compartment within said first housing.

Claim 12 (previously prented): The wood floor edger of claim 9, wherein said third opening is located adjacent said fan and wherein a vacuum device is attachable to said third opening.

Claim 13 (original): The wood floor edger of claim 1, and further comprising at least one wheel attached to said first housing.

Claim 14 (cancelled)

Claim 15 (original): The wood floor edger of claim 1, and further comprising a second housing having a handle attached thereto.

Claim 16 (previously presented): The wood floor edger of claim 15, wherein said handle is located opposite said opening of said first housing.

Claim 17 (previously presented): A wood floor edger comprising:
a first housing comprising a first opening, a second opening, a third opening, and a rotatable abrasive disc located adjacent said first opening;
a motor at least partially located in said second opening and drivingly connected to said abrasive disc;
a fan located in said first housing and proximate said third opening, said fan being drivingly connected to said motor;
an air path extending between said first opening and said third opening by way of said fan; and
a motor controller electrically connected to said motor;
wherein said motor is operatable at a speed that is preselected by said motor controller.

Claim 18 (original): The wood floor edger of claim 17, wherein said rotatable abrasive disc has a diameter of about seven inches.

Claim 19 (previously presented): The wood floor edger of claim 17, wherein the weight of said wood floor edger is about twenty-seven pounds.

Claim 20 (original): The wood floor edger of claim 17, wherein said motor is rotatable at a speed of greater than three thousand revolutions per minute.

Claim 21 (original): The wood floor edger of claim 17, wherein said motor is rotatable at a speed of about ten-thousand five-hundred revolutions per minute.

Claim 22 (original): The wood floor edger of claim 17, wherein said motor has horsepower greater than two.

Claim 23 (original): The wood floor edger of claim 17, wherein said motor has horsepower of about 2.4.

Claim 24 (original): The wood floor edger of claim 17, wherein said motor is connected to said rotatable abrasive disc by a belt.

Claim 25 (cancelled)

Claim 26 (previously presented): The wood floor edger of claim 17, wherein said fan is located within a compartment within said first housing.

Claim 27 (previously presented): The wood floor edger of claim 17, wherein a vacuum device is attachable to said third opening.

Claim 28 (original): The wood floor edger of claim 17, and further comprising at least one wheel attached to said first housing.

Claim 29 (cancelled)

Claim 30 (original): The wood floor edger of claim 17, and further comprising a second housing having a handle attached thereto.

Claim 31 (cancelled)

Claim 32 (previously presented): The wood floor edger of claim 1, wherein said wood floor edger has a weight of less than twenty-eight pounds.

Claim 33 (previously presented): The wood floor edger of claim 1, wherein said motor is a brushless motor.

Claim 34 (previously presented): The wood floor edger of claim 30, wherein said motor is located between said first housing and said second housing.

Claim 35 (new): The wood floor edger of claim 30, wherein said handle is located opposite said second opening of said first housing.
